EXPERIENCE

Symmatrics Inc. June 2026 - Present
Cyber Security & Business Strategy Associate Intern *Vienna, VA*

- Perform vulnerability assessments and security validation of enterprise applications, authentication, and secure access technologies
- Identify attack surfaces in encryption SDK, secure VPN, and key-management components and recommend defensive controls and hardening measures
- Engineered an automated threat-intelligence pipeline (Python, ransomware.live API, Supabase) that ingests, de-duplicates, and enriches ransomware-victim breach data into a React dashboard for analyst review

University of Houston Sept. 2025 - May 2026
Graduate Teaching Assistant, Network Security (CIS 6325) & Database Systems (CIS 4365) *Houston, TX*

- Mentored graduate students on network defense, secure protocols, cryptography, firewalls, IDS/IPS, and network attack mitigation
- Mentored undergraduates in ERD design and SQL; graded assignments and exams for both courses

DeepCytes Cyber Labs UK Feb. 2025 - May 2025
Cyber Development Analyst Intern *Mumbai, India*

- Analyzed and documented Flatpak application behavior on Phosh and GNOME across PureOS and Arch Linux

EDUCATION

University of Houston, Cullen College of Engineering Houston, TX
Master of Science in Cybersecurity; GPA: 4.0/4.0 *Expected May 2027*
Amity University Mumbai Mumbai, India
Bachelor of Technology in Computer Science Engineering; GPA: 3.3/4.0 *May 2025*

PROJECTS

Detection Engineering Lab | *Splunk, Sysmon, MITRE ATT&CK* GitHub

- Wrote detections for PowerShell abuse, credential access, persistence, and anomalous logons; mapped to ATT&CK and tuned false positives

Threat Hunting Lab | *Splunk, Sysmon, Atomic Red Team* GitHub

- Ran hypothesis-driven hunts over Windows telemetry for simulated execution, persistence, and credential access; logged detection gaps

Automated IOC Enrichment Tool | *Python, Threat Intelligence APIs* GitHub

- Automated enrichment and classification of IPs, domains, and file hashes into structured output supporting triage and incident analysis

CyberSentinel: Web Vulnerability Scanner | *Python, Requests, BeautifulSoup, Jinja2* GitHub

- Built an automated tool that flags common web vulnerabilities and misconfigurations with remediation guidance

TECHNICAL SKILLS

Cyber Defense: Detection Engineering, Threat Hunting, Incident Response, Vulnerability Management, Hardening
Frameworks: MITRE ATT&CK, OWASP Top 10, Cyber Kill Chain
Tools: Splunk, Sysmon, Security Onion, Suricata, Zeek, Wireshark, Nmap, Burp Suite, Atomic Red Team
Languages & Platforms: Python, SQL, C/C++, Windows, Linux, Active Directory, AWS, Microsoft Azure, Git

CERTIFICATIONS & ACHIEVEMENTS

Certifications:
CEH v13, CompTIA Security+ (In Progress), Google Cybersecurity Certificate, Azure AI Fundamentals, Cisco Intro to Cybersecurity, AZ-500 (In Progress), SC-300 (In Progress), SC-200 (In Progress)
Activities:
Secretary, Women in CyberSecurity (WiCyS), University of Houston Chapter (2026–2027) Serving as an active chapter officer, supporting cybersecurity events, student engagement, professional networking, and coordination of chapter initiatives.
CoogsForEnergy Hackathon 2026 – 1st Place Winner, developed an end-to-end solution for aligning Permian Basin natural gas quality with LNG export specifications, involving real dataset analysis and integrated treatment and digital strategies.
KPMG Hackathon 2024 – Participated in the Capture the Flag Event
DOE CyberForce 2026 (UH team)
Cybersecurity Core Committee (Pioneer), Google Developers Group (2024–25) – Led initiatives and taught cybersecurity principles
